Title : Backup and Recovery
Solutions Exam for Technology
Architects

Vendor : EMC

Version : DEMO

NO.1 A service provider has an EMC Avamar server supporting many of their customer's backup requirements.

They need to create customized reports for each customer for billing purposes. Currently, existing reports on Avamar do not meet this requirement.

How can the service provider generate customized reports?

- A. Configure Crystal Reports to extract data using Avamar MCCLI
- B. Configure Microsoft Excel to access the Avamar MySQL database
- C. Use Data Protection Advisor to access the Avamar PostgreSQL database
- D. Use Backup and Recovery Manager to track backup capacity usage per customer

Answer: C

NO.2 What is considered an Avamar stripe?

- A. Variable sized units of deduplicated data
- B. Hash ID that represents a backup
- C. Unit of disk space for storing objects
- D. List of previously backed up hashes

Answer: C

NO.3 A customer currently uses two different backup applications in their backup environment. They are looking for a new backup target device to replace their aging physical tape infrastructure without replacing the current backup applications.

Which EMC product best fits these requirements with the least amount of configuration change?

- A. NetWorker
- B. Data Domain
- C. Avamar
- D. HomeBase

Answer: B

NO.4 What is the minimum number of checkpoints EMC Avamar retains by default?

- A. 4
- B. 1
- C. 3
- D. 2

Answer: D

NO.5 Which feature of EMC Data Domain systems maximizes storage efficiency?

- A. Compliance Locking
- B. Data Deduplication
- C. Remote Replication
- D. Continuous Verification

Answer: B

NO.6 A company located in Amsterdam has recently acquired a company in Rome. Since both

locations have their own file servers containing sensitive data, they want to back up everything to their central backup repository in Amsterdam.

The customer only has a 2 Mb/s connection between both locations. What is the best EMC product to back up everything to the Amsterdam office?

- A. HomeBase
- B. Data Domain
- C. Avamar
- D. NetWorker

Answer: C

NO.7 What is the functionality of EMC NetWorker Checkpoint Restart feature?

- A. restarts the backup at a known good point
- B. consolidates the backup with a previous level backup
- C. always restarts the backup from the beginning
- D. continues the backup from where it failed

Answer: A

NO.8 An EMC NetWorker customer needs to improve the RTO for all backups retained onsite. Most of the backup jobs consist of images and other scientific data. The customer requires daily tape out for long-term offsite retention. Which product addresses these challenges?

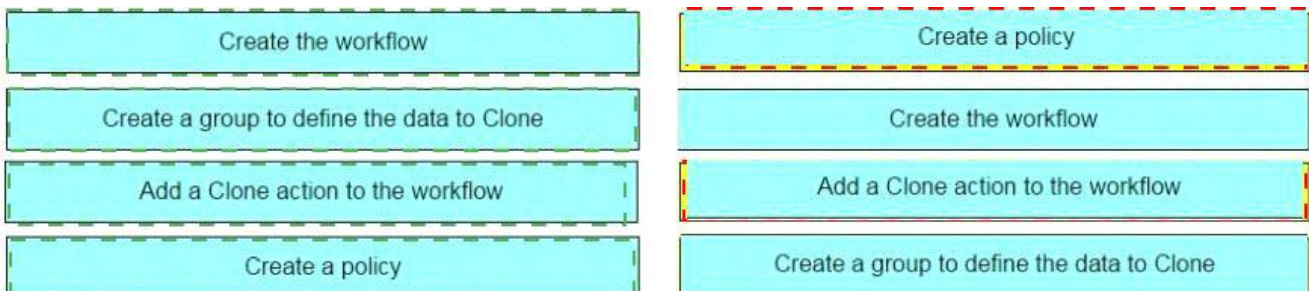

- A. EMC Disk Library
- B. NetWorker deduplication node
- C. Avamar
- D. Data Domain

Answer: B

NO.9 What is the correct sequence of operations for configuring Clone action in NetWorker?

Answer:

NO.10 A customer is considering EMC backup applications and has a large 20 TB MS Exchange

environment generating 1 TB of transaction logs daily. Which EMC backup solution can support daily backups of the environment?

- A. NetWorker with Data Domain
- B. NetWorker with Avamar Integration
- C. Avamar Virtual Edition
- D. Avamar 1X12+1 Data Store

Answer: A

NO.11 What is an advantage of EMC NetWorker Open Tape Format?

- A. Supports simultaneously backup and restore
- B. Writes different OS backups to specific volumes
- C. Enables faster backup and restore from tape
- D. Storage nodes can be moved to hosts with a different OS

Answer: D

NO.12 A customer wants to run Data Protection Advisor on a Solaris host without using the embedded database.

Which alternate database is supported?

- A. SQL
- B. Oracle
- C. iAnywhere
- D. PostgreSQL

Answer: B

NO.13 To consolidate backup servers, which component plays an important role in EMC NetWorker backup planning?

- A. Virtual tape library
- B. Management host
- C. Storage node
- D. Proxy server

Answer: C

NO.14 A customer is considering an EMC Avamar 1x4 server. However, they are concerned about losing data in the event of a hardware failure. Which feature will prevent single point of failure?

- A. Integration with Data Domain
- B. Spare node
- C. RAIN
- D. Integration with NetWorker

Answer: C

NO.15 A customer is preparing for their Data Protection Advisor (DPA) implementation. Which TCP port needs to be opened to allow the DPA server to talk to a Collector outside the firewall?

- A. 4011

B. 3741

C. 9002

D. 3616

Answer: B

NO.16 Which application is protected by using EMC NetWorker VADP backups?

A. Microsoft Hyper-V

B. IBM LPAR

C. VMware vSphere

D. Citrix XenServer

Answer: C
